

Your channel data is running your business. You just can't see it.

Commission disputes from POS data
you never got in a usable format.

No single view of POS, direct sales, and
inventory, scattered everywhere

Design registrations still tracked in spreadsheets,
chased by email, lost between systems.

Ship and debit claims you cannot reconcile
because the data arrives late, wrong, or both.

SIGNAL was built to close this gap.

One platform connecting your POS data, direct and OEM sales,
inventory and commissions. Real-time commercial intelligence
for the electronics supply chain.

FOR SUPPLIERS

Real-time POS data feeding accurate
commissions. Direct, OEM, and distributor
sales connected in one place, not
scattered across twenty.

FOR DISTRIBUTORS

Stay compliant with every supplier
partner. Submit POS, ship and debit,
and design registrations through one
connection, not twenty.

What SIGNAL Does

Five modules. One platform. Available Q4 2026.

POS & DIRECT SALES DATA

Accurate POS data, normalized, on time, ready for commissions.

SHIP AND DEBIT

Reconciled ship and debit claims. No more chasing. No more disputes.

DESIGN REGISTRATION

Design registrations filed, tracked, and confirmed, without the spreadsheet.

COMMISSION CALCULATIONS

Real-time commission calculations and splits, based on actual data.

CUSTOMER CONTROL TOWER

Forecast compliance and demand signals visible before they become problems.

INVENTORY COLLECTION AND PROCESSING

Distributor inventory and POS data with summary and detail reporting built in.

WHY ORBWEAVER?

Purpose-built for the electronics supply chain since 2012. Not adapted from another vertical. Trusted by Analog Devices, Texas Instruments, Mouser Electronics, Digi-Key, TTI, Yageo, Rochester Electronics, and Waldom Electronics.

See it in Action.

Book a 30-minute demo. We will walk through the modules relevant to your organization:
